

Hands-on@VEITHsymposium 2015

Open vascular surgery course, New York, November 19, 2015:

Morning session: Course in Open Surgery for AAA

Afternoon session: Course for Open Carotid Surgery

[Registration here...](#)

On behalf of Dr. Frank J. Veith and VASCULAR INTERNATIONAL, it is a great privilege to warmly welcome you to the second Workshop on open vascular surgical techniques at the VEITHsymposium. VASCULAR INTERNATIONAL, also known as „Pontresina group“, is performing vascular surgical workshops for 25 years and has become the number one platform for practical hands-on training and education in open vascular and endovascular techniques in Europe and worldwide.

These worldwide unique workshops have proved over the last years to be a very effective postgraduate training method both for beginners in general surgery and advanced vascular surgeons, the techniques used are part of the Fellowship of European Board of Vascular Surgery (FEBVS) examination. The success of these workshops is in great part due to the importance of practical training on state-of-the-art infrastructure and the intensive supervision by the multi-lingual tutor team who have vast experience in vascular surgery and teaching.

Attendees receive a VASCULAR INTERNATIONAL Certificate

Organization:

VASCULAR INTERNATIONAL

Program:

Thursday, November 19, 2015

Morning session: Course in Open Surgery for AAA

17.00-17.30	Feedback-session, Certificates, farewell

Convenors:

[Klaus Klemm](#), Stuttgart, Germany

[Lorenz Guerke](#), Basel, Switzerland

and the [VASCULAR INTERNATIONAL faculty](#)

Location:

The New York Hilton Hotel Midtown, 1335 Ave of the Americas, New York, NY 10019
Americas Hall 3rd floor from entrance to the left

Confirmation of availability:

Having limited capacity, you will receive a message from VASCULAR INTERNATIONAL 10 days before the course where you are asked to reconfirm your participation by email.

Our basic and masterclass workshops provide excellent hands-on experience on pulsatile realistic models (to perform open straight forward and complex aortic repair, endovascular aortic reconstruction, carotid endarterectomy and distal bypass surgery) and virtual simulators (for carotid, iliac and renal interventions). The close tutor- trainee interaction guarantees an intensive learning process. You will train in pairs of two, using original vascular grafts and sutures.
