Dedicated Workshop To Improve Treatment Of Ruptured AAAs: What Is Involved And What Benefits Are Derived

Zoran Rancic
Isabelle Van Herzeele
Mario Lachat

WHY DEDICATED WORKSHOP ON RAAA?

- RAAA is fatal if not treated
- Many debates: eEVAR or COS for RAAA
- There are less RAAA
- UHZ / other centers very good results for eEVAR
- No clear Standard operating procedure for aortic emergencies in many hospitals
- No clear pre, in- and posthospital pathways for treatment of RAAA in many hospitals
- Goal: disseminate experience and teach about Management of RAAA

Management and Logistics start with...SOP

It is a package of different components
UNDER THE AUSPICES OF?

Short presentation 12 participants

Short curriculum
Training/Experience level
Personal experience in RAAA
Position
Institution

Vascular Procedures in my Centre

Ruptured AAA in my hospital

- Volume/year
- How many EVAR? (%)
- What are the logistics?
- Outcome
  - mortality & morbidity (approximately)

What do I expect from the Workshop (Freetext)…
SETTING

- Lectures (knowledge)
- Interactive workstations (technical skills, and human factors skills)
- Interactive discussions (experts faculty/participants)
- Exciting breaks (dinner, lunch, coffee)
- Debriefing

Management of blood pressure

ENDOCLAMPING in case of hemodynamic crash
Hemodynamics Imaging Procedures

Preoperative (CT)
- Confirm diagnosis
- Planning

Intraoperative Procedure

Postoperative (CTA)
- Need for further Tx?

“Additional oversizing”
Hemodynamics
Imaging
Procedures
ACS
TEAM

PERCUTANEOUS ACCESS

„OPERATING THEATRE“

FLOW MODEL
Aortic endoclamping

OPEN SURGICAL ADJUNCTS

LIFT TECHNIQUE ON GLASS MODEL
Transfemoral chimney graft technique
FUTURE PERSPECTIVES

- Assessment prior to courses
- E-learning + MCQ prior to course
- Distributed vs. mass training
- Implementation in real life
- Credentialing
