No Conflict of Interest
How to Write and Publish?

10. Write a high quality, scholarly paper

- Excellent and innovative research
- Important and interesting topic
- Presented in a clear and logical way
- Written in good English, with attention to spelling, grammar and syntax*

9. Write a paper that likely will be highly cited

6. Check all parts of your paper before submission
   - Title states main finding, complies with rules
   - Abstract is structured (Background, Methods, Results, Conclusions), Conclusions based on Results
   - Figures, Tables help to understand results
   - Statistics done correctly, likely by a statistician

5. Write a cover letter to the Editor
   - Brief (half page)
   - State the main theme of the paper
   - Explain what is new
   - Explain any issues (previous similar publications, problems with authorship, figures)

4. Be sure the review process is smooth
   - Be respectful
   - Major Revise is excellent news: the Editors want your paper
   - If you agree, comply with the reviewer's request
   - If you disagree, be polite and explain your position
