NEEDS ASSESSMENT
Vascular disease is a leading cause of disability and death in patients over age 50. Nonvascular intervention, especially in oncology patients, continues to increase in most busy practices. As such, there is a critical need for physicians who manage these patients to receive CME in this area. To address this need, the AIMsymposium will review the latest pharmacologic, radiologic, surgical and endovascular techniques and technologies as well as discuss when these treatments are needed to improve the competence and performance of participants. Updates on clinical trials and opportunities for dialogue with experts in the field will provide insight, along with the latest data on the results of the various treatment modalities.

SYMPOSIUM FORMAT / GOAL
The Advanced Interventional Management Symposium (AIMsymposium) will be held Monday - Thursday, November 13 - 16, 2017. The scientific sessions, panel discussions and case presentations, presented by a nationally renowned faculty, will provide a concise overview of the most current issues and hands-on experience in new techniques in percutaneous, endovascular and surgical treatment methods. Highlights of the meeting will include hands-on workshops, didactic workshops and case presentations that optimize learning and are applicable to your practice. Additionally, there will be a full-day program devoted to important topics related to acute stroke management. There will be special emphasis on interventional oncology, PVD, aneurysms, embolization devices, TIPS, fibroid management, vascular imaging, neurointervention, hemodialysis access, venous disease and venous interventions.

SYMPOSIUM OBJECTIVES
At the conclusion of this meeting, participants will be able to:
- Acquire new knowledge in the diagnosis and treatment of peripheral vascular disease
- Diagnose and treat abdominal aortic aneurysms in a minimally invasive manner
- Diagnose and treat various types of tumors with embolic agents and radiofrequency ablation using imaging
- Review the normal anatomy and the pathology of veins in the lower extremities
- Describe the various methods of maintaining vascular access in the dialysis patient
- Summarize recent data on the treatment advances for venous disease and explain their clinical implications
- Assess best practices in acute stroke management

TARGET AUDIENCE
Interventional Radiologists, Vascular Surgeons, Interventional Cardiologists, Interventional Nephrologists, Neurosurgeons, Neuroradiologists, Interventional Neurologists, Oncologists and all Health Care Practitioners involved in image guided procedures.

ACCREDITATION STATEMENT
The Cleveland Clinic Foundation Center for Continuing Education is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. The Cleveland Clinic Foundation Center for Continuing Education designates this live activity for a maximum of 36 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Participants claiming CME credit from this activity may submit the credit hours to the American Osteopathic Association for Category 2 credit.
NEW THIS YEAR! ASSOCIATE FACULTY PODIUM PRESENTATIONS PROGRAM

In order to provide interventional radiology and neurointerventional radiology fellows, residents and aspiring IR/INR medical students with podium experience, the AIMsymposium will hold its first Associate Faculty Podium Presentations Program. Interventional Radiology and Neuroradiology Fellows, Residents and Medical Students can submit an abstract to the Associate Faculty Program for presentation at the podium. Accepted abstracts will be posted on the AIMsymposium website for up to one full year and can be used for reference. The best three presentations will receive cash prizes. The program is also open to interventional radiologists and neurointerventionalists in their first 2 years of practice.

CME CERTIFICATES AND COURSE EVALUATION FORM

CME certificates will be available online at www.aimsymposium.org. An e-mail with a unique password and instructions on how to obtain the certificate and complete a brief, optional course evaluation will be sent to all registered attendees after the meeting. The e-mail will be sent to the e-mail address that was used to register the attendee. Please note that CME Certificates must be claimed by February 28, 2018.

FACULTY DISCLOSURE

The Cleveland Clinic Foundation Center for Continuing Education has implemented a policy to comply with the current Accreditation Council for Continuing Medical Education Standards for Commercial Support requiring resolution of all faculty conflicts of interest. Faculty declaring a relevant commercial interest will be identified in the activity syllabus.
