| Lunch Symposium | **Together. Advancing Vascular Care.** | Discover how recent developments are helping physicians make a difference in the lives of patients. This discussion, focused on how we partner with you to solve unique needs in complex cases will feature insights, clinical findings, and case studies across the spectrum of vascular care; from aortic and carotid to peripheral and more.  
*Mark Farber, MD, Chapel Hill, North Carolina*  
*Claudio Schönholz, MD, Charleston, South Carolina* |
| Evening Event | **Together. Improving Outcomes, Changing Lives.** | Experience the treatment journeys of complex cases from the perspective of patients and their physicians. This evening features inspirational personal narratives focusing on how our innovative vascular solutions and collaborative partnerships have impacted their treatments and their lives. |

*Dennis Gable, MD, Dallas, Texas*  
**Evaluating the Gore® TAG® Conformable Thoracic Stent Graft with ACTIVE CONTROL System: What does early clinical experience tell us about this new device?**  
*Giovanni Torsello, MD, Münster, Germany* |
| Evening Event | Pavilion is in-use for invitation only event. |                                               |
Friday, November 17

6:00 am
Lunch Symposium

Insights from Latin America
Chairman: Pierre Galvagni, MD, Florianópolis, Brazil
Moderators: Bernardo Massiére, MD, Rio de Janeiro, Brazil
Bruno Freitas, MD, Maceió and Leipzig, Brazil and Germany

- Endograft treatment demonstrates durable benefits in a 2-year RELINE Trial
  Sidnei Galego, MD, São Paulo, Brazil

- GORE® VIABAHN® Endoprosthesis demonstrates powerful patency in 20+ cm SFA Lesions
  Marcio Miyamotto, MD, Curitiba, Brazil

- GORE® VIABAHN® Endoprosthesis in treating stenosis or thrombotic occlusions of a synthetic arteriovenous (AV) access graft at the venous anastomosis
  Antonio Henrique de Sousa Quintella, MD, Belo Horizonte, Brazil

Saturday, November 18

6:00 am
Pavilion Opens
Lunch Symposium

How unique dialysis access technologies help optimize patient outcomes

- How early cannulation grafts assist with earlier removal of central venous catheters
  Matteo Tozzi, MD, Varese, Italy

- Achieving long-term value: How stent grafts impact the treatment of the thrombosed dialysis graft
  Scott Berman, MD, Tucson, AZ

- A novel approach to hemodialysis access: Using the GORE® Hybrid Vascular Graft in patients with limited access options
  Scott Berman, MD, Tucson, AZ

Gore MEDICAL MASTERY Series

Hands-On Simulators for Virtual Training

Simulator Pavilion Hours  •  9 am–5 pm  •  Tuesday–Friday
Join us in the Sutton Complex South to experience our lifelike virtual environment simulators for the GORE® EXCLUDER® Iliac Branch Endoprosthesis, the GORE® EXCLUDER® Device, and the Conformable GORE® TAG® Device.
